

Vertikal HI-FI prototype

AalborgHustagram

Husk at...

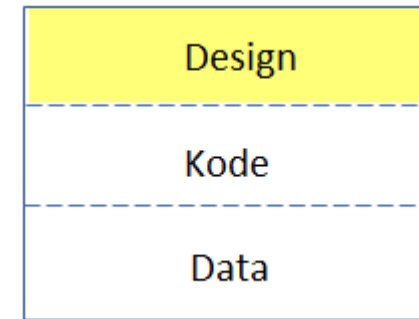

- En **prototype** er *interaktiv* - giver os mulighed for at opleve, hvordan en brugerflade vil fungere i virkeligheden.

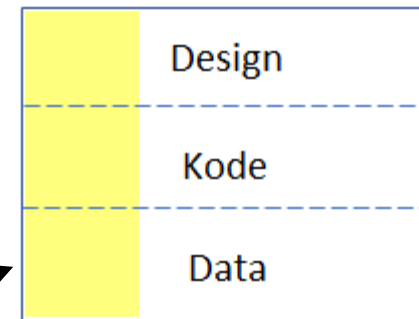

Horisontale og vertikale prototyper

Hi-Fi prototyper

- En **horisontal prototype** dækker store dele af systemet, dvs. de fleste skærme er designet, men koden er mest "setScreen", ingen data

- En **vertikal prototype** dækker en del af systemet, dvs. nogle af skærmene er designet, den tilhørende del af koden er lavet (ikke kun "setScreen"), den tilhørende del af datalaget er med

Man implementerer typisk et brugsmønster ad gangen

Importer filen i App Lab

The screenshot shows the App Lab Data Browser interface. At the top is a purple header bar with the text "Data Browser" on the right. Below the header is a navigation bar with a "Back to data" link on the left and a "Debug view" link on the right. The main area contains the text "opslag" followed by four buttons: "Visualize Data", "Clear table" (highlighted in red), "Import csv", and "Export to csv". A large blue arrow points to the "Import csv" button, with the text "Tryk her!" and "Vælg fil" inside it.

id	column1		+	Actions
#	enter text			<button>Add Row</button>

AalborgHustagram

- Vi skal nu i gang med at lave en **vertikal HI-FI prototype** i App Lab af *AalborgHustagram* app'en
