

Visuel fremstilling: En definition af arkitektur

Workshop i arkitektur

Mulige definitioner af Arkitektur:

- * Arkitektur kan defineres som kunsten og videnskaben at designe bygninger og strukturer.
- * Arkitektur er manipulation af figurer, former, rum og lys til at ændre vores miljø.
- * Arkitektur er det mesterlige, korrekte og storslåede spil af former under lys (Le Corbusier)
- * Arkitektur er manipulation af den menneskelige adfærd gennem fysisk form.

* Diagrammatisk definition af arkitektur v/ Francis D.K Ching fra "Architecture - Form, Space, and Order"

Overgange mellem figurer:

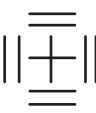

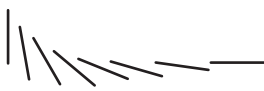

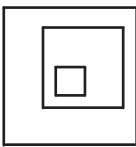

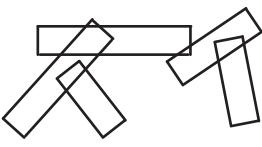

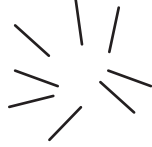

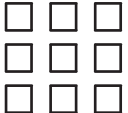

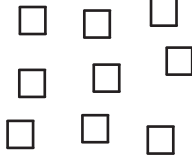

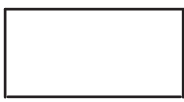

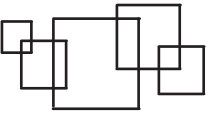

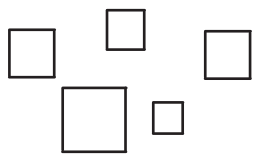

Visuel fremstilling: Begreber / Fænomener

Workshop i arkitektur

Inden for design og arkitektur er der en række begreber - fænomener - vi bruger til at beskrive form med. Mange af ordene kender man fra andre sammenhænge og andre fagområder. Dem har vi "lånt" for at få en fælles referenceramme og et fælles sprog, til at beskrive den fysiske verden vi bevæger os rundt i.

Eksempler på modsætningspar:

Statisk 	Dynamisk 	Harmonisk 	Disharmonisk 
Ritmisk 	Arytmisk 	Stærk 	Svag 
Symmetrisk 	Asymmetrisk 	Introvert 	Ekstrovert 
Lukket 	Åben 	Samlet 	Sprængt 
Kunstig 	Organisk 	Bred 	Smal 
Integreret 	Separeret 	Høj 	Lav
